INDEX OF ABSTRACTS
Volume 11, 1964

Aanderaa, Stal. See Dreben, Burton.

_____. See Fischer, P. C.

Abbott, J. C. and Small, James. Erratum to "Isomorphism theorems in implication algebra," 152.

Abian, Alexander. On theories of sets and the independence of set-theoretical axioms, 377; On uniform structures, 675.

Abian, Alexander and LaMacchia, S. E. Some consequences of the axiom of Power Set in finite theories of sets, 379.

Abian, Alexander and Rinehart, Daryl. Honest subgroups of abelian groups, 231.

Aczel, J. Homotopism problems treated with the aid of functional equations, 105.

Adams, R. D. and Aronszajn, Nachman. Bessel potentials on regular Riemannian manifolds, 109.

Adler, A. W. Universal Laplacians, 113; Laplacians of Kähler manifolds, 537.

Ahlberg, J. H. and Nilson, E. N. Convergence properties of generalized splines, 691.

Ahlberg, J. H.; Nilson, E. N. and Walsh, J. L. Orthogonality properties of the spline function, 468; Extremal, orthogonality and convergence properties of multi-dimensional splines, 468; Fundamental properties of generalized splines, 680; Higher-order spline interpolation, 767.

Ahlborn, T. J. See Bhargave, T. N.

Akutowicz, E. J. Spectral approximation, 343.

Alling, N. L. Rings of integer-valued functions and nonstandard models. Preliminary report, 114.

Alperin, J. L. Towers of fields, nil algebras and Burnside groups: A survey of the Golod-Safarevic Theorems, 766.

Al-Salam, W. A. A characterization of a certain class of orthogonal polynomials, 565.

Amir, Dan. Projections of norm >3 on continuous function spaces, 568.

Amitsur, S. A. The use of ultra-products in algebras, 765.

Anastasio, Salvatore. Maximal abelian subalgebras in hyperfinite factors, 383.

Anderson, R. D. The Hilbert cube as a product of dendrons, 572; On a theorem of Klee, 758.

Anderson, R. V. The geometry of triangles in the Minkowski relativistic plane, 143; The nine point hyperbolic circle C_N of a triangle T in the Minkowski plane M_2, 448; The circumscribed and tangent hyperbolic circles of a triangle in the Minkowski plane, 449.

_____. See DeCicco, John.

Appel, K. I. and McLaughlin, T. G. On complementary regressive sets, 139.

Appling, W. D. L. A convergence theorem, Preliminary report, 131; Refinement-unbounded interval functions and absolute continuity. Preliminary report, 144; Characterizations of some absolutely continuous additive set functions. Preliminary report, 240; Nondecreasing functions, interval functions and real Hilbert spaces. Preliminary report, 385; Set functions and an extremal problem in absolute continuity. Preliminary report, 459; A note on nonnegative-valued set functions. Preliminary report, 594; Set functions and zero sets. Preliminary report, 677.

Armentrout, Steve, A property of a decomposition space described by Bing, 369; Point-like decompositions of E^3 with a compact 0-dimensional set of nondegenerate elements, 540.

Armstrong, J. W. On the indecomposability of torsion free groups, 55.

Aronson, D. G. Removable singularities for the equation of heat conduction, 122; Uniqueness of positive weak solutions of parabolic equations, 346.

Aronszajn, Nachman. The Banach algebra of multiplier on a functional Banach space, 98.

_____. See Adams, R. D.

Arsove, M. G. and Johnson, Guy. A conformal mapping technique for infinitely connected regions, 569.

Artemiadis, N. On a class of holomorphic functions, 547.

Asenjo, F. G. Theory of multiplicities, 206; A calculus of antinomies, 663.

Askey, Richard, and Wainger, Stephen. Mean convergence of Laguerre series, 597; A trans-

plantation theorem for ultraspherical series, 669.

Aull, C. E. Identity theorems for generalized variations, 389; Some theorems on the rank of a matrix, 542; Nilpotent matrices, 692; An automorphism theorem for matrices, 772.

Auslander, Louis. Algebraic groups attached to complete compact locally affine spaces, 123.

Auslander, Maurice and Brumer, Armund. Brauer groups of fields with discrete rank one valuations, 119.

Austin, Donald. A short proof of the ergodic theorem, 210.

Axt, Paul. Bounded recursion and iterated recursion, 224; Classes of primitive recursive functions by restricting the number of variables, 234; Iteration of relative primitive recursion, 340.

Aziz, A. K. On a nonlinear integral equation, 223.

Aziz, A. K. and Maloney, J. P. On existence and boundedness of nonlinear Volterra integral equations, 338.

Azpeitia, A. G. and Dickinson, D. J. A decision rule in the simplex method that avoids cycling, 308.

Babcock, W. W. Concerning linear homogeneous continua, 368.

Bacon, Philip. Coincidence of real valued maps from the n-torus, 370.

Bade, W. G. and Curtis, P. C., Jr. Imbedding theorems for Banach spaces and commutative Banach algebras, 337.

Baez-Duarte, Luis. An ergodic theorem of Abelian type. Preliminary report, 467.

Bailey, P. B. Bohr's quantization rule. Preliminary report, 96; Eigenvalues of Schrödinger's equation via a phase function, 564.

Baker, C. A., Jr. and Perry, C. L. Smoothing of histograms and monotone polygonal graphs, 246.

Ballard, D. J. Abstract recursive function theory, 245.

Banchoff, T. F. Minimally embedded 2-dimensional polyhedral manifolds, 125.

Barback, Joseph. Recursive functions and regressive isols. Preliminary report, 146; Three notes on regressive isols, 574; Double series of isols. Preliminary report, 582.

Barnes, B. H. The Kronecker product of directed graphs, 550.

Barnes, R. T. On semi-simple Lie algebras of prime characteristic. Preliminary report, 459.

Barnhill, R. E. Convergence of quadratures on complex contours, 366.

Barros-Neto, Jose. A Dirichlet problem and interpolation theorem, 346.

Bass, Hyman. Grothendieck determinants, 120.

Baxter, G. E. An ergodic theorem with weighted averages, 247; A general ergodic theorem with weighted averages, 464.

Baxter, G. E. and Joichi, J. T. On functions that commute with full functions, 142.

Baxter, W. E. Concerning the commutator subgroup of a simple ring, 543.

Bazinet, Jacques. Fatigue Finsler geometry, 579.

Bean, R. J. Decompositions of E^3 with a null sequence of starlike equivalent nondegenerate elements are E^3, 558.

Bear, H. S. A geometric characterization of Gleason parts, 309; Integral representation of functions on parts of a locally compact space, 561.

Beaumont, R. A. and Pierce, R. S. Quasi-isomorphism of direct sums of cyclic groups, 69.

Beckenbach, E. F. Isoperimetric inequalities for related conformal maps, 390; Superadditivity inequalities, 390.

Bednarek, A. R. On chain-equivalent relations. Preliminary report, 749.

Beidleman, J. C. A radical for near-ring modules, 237.

Beineke, L. W. and Harary, Frank. The genus of the n-cube, 80; On the thickness of the complete graph, 80.

Belluce, L. P. and Jain, S. K. Power commutative rings, 308; Prime rings with a one-sided ideal satisfying a polynomial identity, 554.

Beltrami, E. J. and Wohlers, M. R. On a converse to a theorem of Fatou, 663.

Ben-Israel, Adi and Charnes, A. Polarity, duality and cones with general ordered scalars, 230.

Bennett, Ralph. Embedding products of chainable continua, 352.

Benson, G. M. A hierarchy in the theory of implicit definability, 689.

Berens, H. See Butzer, P. L.

Berg, I. D. Perturbations of linear operators and summability. Preliminary report, 70.

Berger, Robert. The undecidability of the domino problem, 537.

Berin, A. Convergent Gamma function formulae. Preliminary report, 551, 693.

Bernardi, S. D. Circular regions covered by schlicht functions, 128.

Bernstein, A. R. An invariant subspace problem for Banach spaces. Preliminary report, 586.

Bernstein, A. R. and Robinson, Abraham. Solution of an invariant subspace problem of K. T. Smith and P. R. Halmos, 586.

Beyer, W. A. The pseudo-sparseness of the inverse sequence of a sparse matrix sequence, 342.

Bhargava, T. N. Some results in theory of digraphs, 230.

Bhargave, T. N. and Ahlborn, T. J. Directed graphs and point-set topology, 341.

Bhatia, N. P. On a theorem of Malkin, 571.

Biggs, R. G. See Tamura, Takayuki.

Bilodeau, G. G. Summability of Laguerre series. Preliminary report, 63, 470.

Bing, Kurt. A special case of the axiom choice, 320.

Bing, R. H. and Borsuk, K. Some remarks concerning topologically homogeneous spaces, 237.

Birkhoff, Garrett. Error bounds for spline fits, 455.

Birtel, F. T. and Lindberg, J. A., Jr. A Liouville algebra of nonentire functions, 372.

Blakley, G. R. Some positive symmetric quadratic transformations have a convergent sequence of iterates, 363.

Blefko, R. L. See Mrówka, S. G.

Blefko, R. L. and Mrówka, Stanislaw. On E-completely regular transformations, 556.

Bloom, D. M. The subgroups of SL(3,q). II, Preliminary report, 460; The subgroups of SL(3,q). III, Preliminary report, 461; On the subgroup of SL(3,q). IV. Preliminary report, 681.

Blum, E. K. Enumeration of recursive sets by Turing machine, 218; A direct proof that partial recursiveness implies partial computability, 246; Minimization of functionals with equality constraints, 589; Finitely generated free subsemigroups of a free semigroup, 686.

Blum, Manuel. Measures on the computation speed of partial recursive functions, 127.

Boehm, B. W. Functions whose best rational Tchebycheff approximations are polynomials, 143; The degree of convergence of best rational Tchebycheff approximations, 144; Convergence of best rational Tchebycheff approximations, 144; Existence of best rational Tchebycheff approximations, 147.

Boehme, T. K. The positive cone in the space of locally integrable functions, 533.

Bogdanowicz, Witold. On existence of asymptotically almost periodic and almost periodic solutions of nonlinear operational-differential equations, 69; On a nonlinear hyperbolic system of differential equations, 145; Existence and uniqueness of asymptotically almost periodic and almost periodic solutions of nonlinear operational-differential equations, 145; Existence of periodic solutions of nonlinear operational-differential equations, 146; An approach in developing the theory of the Lebesgue-Bochner integral, 323; On a linear continuous operator in the space of continuous functions, 450; On the existence of periodic solutions of nonlinear partial differential equations, 450; On the existence of almost periodic and asymptotically almost periodic solutions for nonlinear partial differential equations, 450; An approach in developing the theory of Lebesgue and Bochner measurable functions, 549.

Bogdanowicz, Witold and Krauze, Tad. On a functional-integral equation, 145.

deBoor, Carl and Lynch, R. E. General spline functions and their minimum properties, 681.

Borosh, I. and Fraenkel, A. S. Fractional dimension of a set of transcendental numbers, 555.

Borsuk, K. See Bing, R. H.

Bose, R. C. See Bruck, R. H.

Bose, R. C. and Bruck, R. H. Linear representations of projective planes in projective spaces, 565.

Bourne, S. G. On Pontryagin-van Kampen duality for a locally compact abelian semigroup, 322.

Brace, J. W. and Nielsen, R. M. Completions, 106.

Bradley, J. S. A canonical form for a boundary value problem involving a quasi-differential operator of Euler type, 755.

Bragg, L. R. A Rodrigue's formula for the Laguerre polynomials, 664.

Bramble, J. H. On the numerical solution of the Dirichlet problem for $u + ku = F$, 97.

Bramble, J. H. and Hubbard, B. E. A finite difference analog of the Neumann problem for Poisson's equation, 95.

Brandstein, A. G. 2-manifolds as maximal ideal spaces, 770.

Brannen, J. P. On symmetry in a summability theory, 319.

Brauer, Fred. Some refinements of Lyapunov's second method, 369.

Brechner, B. L. On the dimensions of certain spaces of homeomorphisms, 752.

Brenner, J. L. Theorems of Geršgorin type, 307.

Brickell, Frederick. Differentiable manifolds with an area measure, 364.

Brothers, J. E. Integral geometry in homogeneous spaces, 585.

Brown, D. R. Topological semilattices on the 2-cell, 365.

Brown, E. H., Jr. and Peterson, F. P. Relations among mod p characteristic classes, 359.

Brown, H. I. See Cowling, V. F.

Brown, K. R. and Wang, Hao. Short definitions of the class of ordinals, 455; Finite sets and axioms of limitation, 456.

Brown, R. D. Reflection laws of fourth order elliptic differential equations, 75.

Brown, R. F. On a homotopy converse to the Lefschetz fixed point theorem, 743.

MEETINGS OF THE AMERICAN MATHEMATICAL SOCIETY

Abstracts of Contributed Papers, 51, 205, 306, 442, 527, 662, 741
Calendar of Meetings, 4, 180, 264, 408, 480, 632, 712
Preliminary Announcements
February: New York, 29
April: New York, 29, 186; Reno, 185; Chicago, 188
June: Pullman, 287
August: Amherst, 288, 411
October: Garden City, 504
November: Los Angeles, 636; Athens, 636; Evanston, 637
January: Denver, 637, 723
Program of Meetings
January: Miami, Florida, 5
February: New York, New York, 181
April: Reno, Nevada, 265; New York, New York, 269, Chicago, Illinois, 280
June: Pullman, Washington, 409
August: Amherst, Massachusetts, 481
October: Garden City, New York, 633
November: Los Angeles, California, 713; Athens, Georgia, 716; Evanston, Illinois, 720
Supplementary Programs, 47, 200, 303, 438, 523, 658, 739

MEMORANDA TO MEMBERS

Announcement of Changes in the Combined Membership List, 414
Backlog of Mathematical Research Journals, 191, 505
By Title Abstracts, 294
Chairmen, 41
Corporate Members, 190, 737
Employment of Retired Mathematicians, 190, 414, 506, 737
Employment Register, 43, 414, 737
London Mathematical Society, 43
National Register of Scientific and Technical Personnel, 41
Panel of Consultants on Graduate Instruction, 41
Postal Rates, 661
Reciprocity Agreement with the Turkish Society for Pure and Applied Mathematics, 294
Summer Employment Opportunities, 43, 737
